

# 5 Golden Rules

1. The strings must not stick inside the nut slots
2. There must not be any string buzz when picking the unfretted strings
3. Pick all unfretted strings in one even and fast strum close to the Neck Pickup position (sound hole), strum with medium force
4. Let the strings resonate for 3 -5 seconds
5. Mute strings, which are in tune already and keep them muted while picking the strings that are still out of tune only

\* If you continue to have problems, perform a factory reset
